## POST ROCK CATTLE COMPANY

Dear Fellow Cattle Producers:

Welcome to this year edition of the "Cowman's Kind" bull and female sale. Our crystal ball isn't as clear as many industry experts and seedstock producers who annually forecast the future for the beef industry this time of year. So as usual, we will refrain from that bit of wisdom. However what is abundantly clear is that producers who have implemented a cross breeding program combined with a strong preventive herd health program have extra pounds, extra genetics and extra management practices to market and they are being rewarded like never before. Granted, not everyone is making money as they were only 2 short years ago but reasonable profits remain for those who are willing to do the extra work to produce superior cattle.

This year's sale offering is extremely strong. The bulls are a tremendous group and they are loaded from top to bottom in both the purebred and balancer divisions. We are offering many new AI sire groups to choose from and some of our most proven genetics sell in volume sire groups. Many of the cows who produced this bull crop have multiple generations of AI & ET mating's stacked to produce the highest quality herdsires available. Over 600 cows and many AI & ET mating's were used to produce the bulls selling this year and the sale offering reflects that level of culling and commitment. Additionally we feel the 6 year old and 2 year old females are our strongest group to date. Many of the elite, proven donors of the breed are the dam or granddam of the females selling. We are proud of each and every bull and female selling and each animal is expected to have a positive impact on their new owners' herd.

As in the past, we have bulls from our cooperator herds: Meadowlark Gelbvieh, Dawson Creek Gelbvieh, Twin Oak Gelbvieh, and Stucky Beef Genetics. Our cooperator herds allow us to increase the selection pressure placed on the bulls and they make it possible for us to offer more bulls. We share in the income from these bulls, and they are represented and guaranteed just like our bulls. Should a problem arise, you will deal with Post Rock.

We hope to assist you in increasing your profitability, as our survival in the seedstock business is based upon it. We have learned from experience that, unfortunately, we cannot spend enough time with each of you on the sale day. We encourage you to call or visit at any time prior to the sale. We look forward to seeing you February 25th at the sale.

Sincerely,  
Bill and Leland Clark

## TERMS & CONDITIONS

### Terms

The terms of the sale are cash. Animals are to be paid for during or immediately following the sale. Each animal will be sold to the highest bidder. We have made every effort to provide as complete and accurate information as possible. However, announcements from the auction stand will take precedence over information printed in the catalog.

### Bidding

Any disputes or challenges regarding bids shall be settled by the auctioneer, and his decision shall be final. Mail or telephone bids will be handled with strictest of confidence.

### Semen Check & Guarantee

Each bull is guaranteed to settle healthy, fertile females and has been semen tested. Should any bull be claimed a non-breeder, the recommendation of the American Gelbvieh Association will apply. However, this does not preclude us from making adjustments that are mutually beneficial to both parties.

### First Breeding Season Guarantee

- If any bull purchased in the Cowman's Kind Sale or privately from Post Rock dies or is disabled during the first 90 days following first turn out of a young bull, the following guarantee will apply.
- If your young bull is temporarily unable to complete the breeding season, if possible, Post Rock will provide you with a loaner bull without cost to you other than transportation of the bull from and back to Post Rock.
- If your bull becomes permanently disabled, Post Rock will allow full credit (\$5000 Maximum) toward the purchase of one bull in the next Post Rock sale. Post Rock will receive the salvage value of the injured bull. Should the bull you purchase cost more than your credit you pay the difference. If he costs less, no further credit is due to you.
- The above warranty is for bulls used in a single sire breeding pasture. If two or more bulls are used in a breeding pasture the warrant is reduced to 50% of the initial purchase cost.
- If your bull dies within the first 90 days Post Rock will credit you with 50% of the purchase price and provide a loaner bull if available at no cost.
- If you have a problem, please notify us as soon as possible since we try to keep a few bulls available in case your new Post Rock bull is disabled during the first breeding season.

### Liability

All persons attending the Cowman's Kind Sale do so at their own risk. The sale sponsors, sale manager and/or any other seller assumes no liability for accidents, theft or damages done during this event on site of Post Rock Cattle Company.

### Female Lots

Please make arrangements to pickup all female lots within one week of the sale date. If you want Post Rock to deliver female lots delivery prices will apply. Up to 100 miles \$75.00 per lot, 101 to 300 miles \$125.00 per lot, 301 to 500 miles \$200 per lot and over 501 miles \$250.00 per lot.

### BULL Free Delivery or Free Care Until May 1

You may select your choice of the following delivery options for your bull purchases:

- Option 1-Haul your bull sale day and we will deduct \$100 per bull. We will assist you in loading out immediately following the sale.
- Option 2-We will care for your bulls free of charge but at the purchaser's risk and you pick them up any time prior to May 1. Bulls remaining at Post Rock after May 1 will be charged \$2.50 per head per day.
- Option 3-We will deliver bulls free of charge up to 300 miles with additional miles prorated per head and that cost will not exceed \$250 per lot. Purchases totaling \$20,000 or more will be delivered free of charge to an individual ranch or to a central location within your state on group purchases. For animals that we deliver you are encouraged purchase individual animal insurance that will be available sale day at the rate of 4% of the purchase price for 6 months coverage. Other rates apply for longer or shorter insured periods. Inquire at the clerks table.

### Registration Certificates

Registration certificates will be transferred on all sale lots at the seller's expense, except for those marked as unregistered or announced otherwise.

### Sight Unseen Purchases

If you are unable to attend the sale, a bull can be purchased for you on order during the auction. Please call either Bill or Leland in advance of the sale and discuss with us the price range and the type of bull you are looking for, and we will recommend the bull or bulls that will fit your needs. If you don't like the bull when he is delivered to your place, he's not yours; and the money paid will be refunded. If the bull can be purchased for less than your maximum bid, you get the bull for the amount he left the ring at, just as if you were bidding for yourself. Each year, breeders take advantage of this free service. Call if you would like more information or a reference. *For sight unseen satisfaction guarantees, you must purchase an animal that either Bill or Leland have previously recommended to fit your needs.*

### Mortality Insurance

Insurance will be available on sale day at the rate of 4% of the purchase price for 6 months coverage. Other rates apply for longer or shorter insured periods. Inquire at the clerks' table.

### Trich Testing

Many states have new rules for trich testing and none of the sale bulls have been tested. Should a Trich Test be required Post Rock will pay costs involved and complete the testing requirements soon following the sale.

### TELE-AUCTION AVAILABLE

Post Rock is located in a very poor cell phone reception area and we encourage you to utilize this service. If you will be unable to attend the sale, you can do your own bidding via a conference telephone hook up that will connect you to ringside for the sale. You will be able to listen to the sale in progress, talk directly to our ringside representative and bid. Buyers interested in the option should call Bill prior to sale day at 785-792-6244. You will be given the phone number and pass code to join the tele-auction and assigned a bidder number with which to do your bidding. Your only cost will be your normal long distance charges, charged by your long distance carrier. This would work well if you have looked at the sale offering prior to sale day and for sight unseen purchases.

## ABOUT THE SALE CATTLE

### FALL BULLS

The fall bulls were weaned April 29 after being raised on their dams on milo stocks or native pasture with sorghum silage, DDG, and ammoniated wheat straw and received no creep feed. After weaning, the bulls were raised on a rotational grazing system on sedan grass with supplementation of Purina Feeds acu-ration and 8 lbs. of corn per day. On 10/23/15, they were switched to a ration of silage, wet distillers, 1 lb. of corn per 100 lbs. of body weight, ammoniated wheat straw, and grinding-quality alfalfa hay.

### SPRING BULLS

Spring bulls were raised on their dams on native pasture and received no creep. They were weaned August 28 and were placed on a gain test on 10/23/14 through 12/28/16 on a ration of sorghum silage, wet distillers, 1 lb. of corn per 100 lbs. of body weight, ammoniated wheat straw, grinding quality alfalfa hay, and a vitamin mineral pack on a ration designed for 3.25 pounds of gain per day.

### ULTRASOUND

All bulls selling were ultrasound-measured on 12/28/2016. The spring bulls were ratio'd in as large of contemporary groups as possible for the purebred and balancer groups. However, bulls from time to time were not in a contemporary group and therefore don't have a ratio—only an actual measurement. This data was collected by a CUP certified technician, and all data was submitted to the AGA. The fall bulls were too old for data submission, and all data is actual measurements collected by the same certified technician but was a chute side reading only.

The fall purebred and Balancer group were ratio'd against each other. This would include ET bulls and all bulls from all co-operators as they have all been handled the same for over 6 months. As with all raw data, comparisons must be made only within and not between contemporary groups. As an example, compare only spring Balancers to spring Balancers and spring purebreds to spring purebreds. You'll notice a large difference between the fall bulls data & the spring bull data even though many of the same sires are represented in both groups. This was due to the way the bulls were developed and the timing of the ultrasound measurements. Most of the fall bulls were over 365 days old and were adjusted back with decreased rib eye size considerably while the spring bulls were more

typically measured at 11 months of age with a small adjustment up to 1 year of age. If you've followed our program you'll realize in the past 5 to 7 years we have greatly increased our selection pressure on marbling both from an EPD sire selection stand point as well as actual measurements. You'll find many bulls with top 10 to 25% marbling genetics with the data to back it up without sacrificing our 30 plus year goal of "WHERE CALVING EASE, PERFORMANCE AND EYE APPEAL COME TOGETHER."

### SALE COWS

As in the past, our sale group of females includes all our sound six year olds and approximately 20 two year old heifers, most with calves at side. This year's sale group is really strong and includes more top-end cows and is from top to bottom our strongest, most consistent group to date. In my mind, there are at least six cows that deserve to be in donor programs and they have earned that right from their exceptional production. In addition, there are more cows that every ranch needs more of. Cows that get bred every year bring in a calf in the top half of their contemporary group and have high quality udders and the added look and eye appeal we demand.

The two year old sale heifers are selected as a cross-section of our two year olds. Any cow that has at least two daughters in the herd that has an additional daughter is available as a sale heifer as well as any heifer that we have a large number of from their cow family and sire group. These two year olds are handled exactly like the heifers we retained and haven't received any additional supplementation to fatten them up for the sale. We feed no grain to our heifers after weaning—only ammoniated wheat straw, sorghum silage, wet distillers, and grinding quality alfalfa hay. Three weeks prior to AI, as virgin heifers, they receive 2 lbs. of corn for fleshing them up for AI breeding, and this is the only grain they ever receive during their development.

All females bred or exposed greater than 100 days have been pregnancy checked and expected to calve consistent with their respective breeding dates or pasture exposure listed in the catalog. The fall calving cows selling with calf at side have been pasture exposed since calving but sell only as exposed but not guaranteed safe in calf.

## DEFINITIONS FOR DATA IN SALE BOOK

### INFORMATION ABOUT THE BULLS

Our catalog contains a great deal of information, weights and measurements. To clarify the information, please remember that all Scrotal Measurements are actual measurements. Birth Weights are actual weights taken at birth. Weaning and yearling weights are adjusted to 205 days and 365 days respectively.

<b>BW</b>	=	Actual Birth Weight
<b>WW</b>	=	Adjusted Weaning Weight
<b>YW</b>	=	Adjusted Yearling Weight
<b>REA</b>	=	Ultrasound Rib Eye Area, adjusted or actual as noted
<b>IMF</b>	=	Ultrasound Intramuscular Fat, adjusted or actual as noted
<b>FAT</b>	=	Ultrasound Rib Fat, adjusted or actual as noted

### EPDs IN THE SALE BOOK

<b>CED</b>	=	Epd for Calving Ease Direct	<b>CEM</b>	=	Epd for Calving Ease Maternal
<b>BW</b>	=	Epd for Birth Weight	<b>YG</b>	=	Epd for Yield Grade
<b>WW</b>	=	Epd for Weaning Weight	<b>CW</b>	=	EPD for Carcass Weight
<b>YW</b>	=	Epd for Yearling Weight	<b>REA</b>	=	EPD for Rib Eye Area
<b>MK</b>	=	Epd for Milk	<b>MB</b>	=	EPD for Marbling
<b>TM</b>	=	Epd for Total Maternal	<b>FPI</b>	=	Feeder Profit Index

### Genomic EPDs

The major benefits of GE EPDs are: risk reduction through improved accuracies, value of time to assess breeding stock at a younger age, increased rate of genetic progress, and getting data on economically important traits which are expensive or difficult to measure.

### Feeder Profit Index (FPI)

An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

2 year old photo.

It was truly an honor to have co-exhibited with Volek Ranch the 2017 Reserve National Champion Balancer Bull in Denver. He phenotypically excels from every angle . He's massive yet smooth, stout yet flexible, and has the look and pattern we strive for. A thick made , deep sided , big footed, muscular bull in a stylish package that will add performance to his progeny. He combines acceptable calving ease with growth and carcass merit ranking in the top 45%for calving ease 3%CW 5% YW 10% WW 35%FPI and 35% EPI. A bull with fresh genetics that covers all the bases of efficient beef production We have high expectations for his first calf crop which hit the ground this spring A number of cows selling will have his valuable first progeny at side .

*Package Terms: \$1,000 - 25 units semen. Buyer is responsible for all shipping expenses. Package sales close March 1, 2017. After March 1, semen sales will be closed for one year. One split allowed per package, maximum of two breeders per package.*

Pictured at 9 months.

A flush sister to 391Y was a high seller in the 2014 sale and went on to become a donor for Hilltop Farms. This cow is very attractive and similar in her makeup. Several flush brothers were past high sellers including a Denver division winner for Post Rock. She leaves a daughter that is probably the best cow that Meadowlark owns at this time. Anytime you have a chance to buy a 223M2 daughter that is this good, you better do it

5	1.8	66	87	30	63	10	-0.42	29	0.34	-0.29	58.05

This is an outstanding cow who's progeny had nothing but bad luck at Post Rock. Her first calf was among the top 2yr old replacement females but was struck by lightning. Her 2nd calf was injured shortly after weaning and 3rd calving was a set of twins she raised without help at over 1200 lbs. combined and she moved her calving date up from 3/19 to 2/7 with 4th calf that sells as Lot 13. Somehow she still made an AGA Dam of Merit. This cow deserves donor consideration, flush sister to 227Y2 that also sells. A black polled daughter of the Bennett Pacesetter bull a true breeding gem and breeding piece.

AI: 4/29/2016 to Post Rock Power Built 37B8 (1288984)

2016 Dam of Merit that gets it done year after year. Perhaps not as impressive as most of the 223M2 daughters never the less they don't give Dam of Merit awards if you are not a heck of a producer. 3 daughters all retained as her replacement and your chance to own a daughter of the amazing 223M2.

This heifer didn't settle AI last spring and the pasture sire she was with was injured in a bull fight early in the summer and it appears he didn't settle many females so she did get the very rare second chance. Some of the best genetics we've ever produced are represented in this lot.

482C and 488C are probably the heifers that should be staying at home, but you can't KEEP THEM ALL. It is our privilege to offer and your opportunity to purchase breed leading genetics. C-Cross 7309T, the dam of both 482C and 488C was purchased by Post Rock and Twin Oak Gelbvieh in the Fall of 2013 and is known as the Carcass Cow. Flush her to Jackpot and you get the complete package Study the EPDs. Strong performance EPDs, top notch maternal EPDs and off the chart Carcass traits

From the Rhonda tribe comes this Great Western purebred. Her son sold last year to long time Gelbvieh breeders Pace Ranches in Utah. Her dam is a former high seller and now a donor for J Bar M and Hilltop farms and her granddam produced several herd bulls including a top seller to Gustins Diamond D and has a 100BW 106 WW ratio's in production on 11 calves.

Genomic enhanced EPDs. This is exactly why the Gelbvieh breed became popular when the semen was first imported. Here is a moderate framed correctly made daughter of the original German import bull Sherman AMGV3005. I was privileged to see Sherman daughters at Jim Wilson's farm. He had several Sherman daughters from Angus cows that were moderate and thick. I thought they were fantastic in 1982 and I still like them today. Her dam is our donor Angus 548U2 cow by SITZ Alliance 6595. I can't think of 2 bulls that have stood the test of time better than Sherman and SITZ Alliance 6595.

12	0.2	67	107	12	46	12	-0.29	34	0.09	0.71	86.57

Momma Maker is back with another outstanding sire group. He was purchased to be our heifer Balancer bull with an outcross pedigree. He has proven to be much more than that as he sires the extra substance and muscle not typical of calving ease bulls. Today, we use him on our heifers, our mature calving ease cows, and our curve bending cows as well. Look these bulls over. They are good, and most have outstanding ultrasound data.

## C JRI TOP PRODUCER 282Z3

75% GV Balancer® Bull	Red	Homozygous Polled

We purchased this moderate framed powerhouse out of the pick of the Denver bulls in the choice lots in the National Gelbvieh Sale from Judd Ranch. What an exciting outcross herd sire he's proven to be, from his son Powerbuilt who topped the 2015 Post Rock Bull Sale; to Businessman, the winner of the 2015 Breeders' Choice Futurity; to Powerstroke who is the much needed calving ease homo-polled black purebred herd sire; to the sensational sons selling as Lots 1 and 2 this year. His first daughters are calving this spring. Be sure to ask about them. We're really looking forward to getting them into production.

## D DMS STUCKYS TRUSTEE

25% GV Balancer® Bull	Black	Polled
1/9/2012	DMS 025MTZ	1216539

This 10X son came to Post Rock as the high seller in the 2014 Midland Bull Test. His ratios were 106WW, 118ADG, 112 feed efficiency, and 111MBT. He is out of an incredible cow and has outstanding genomic-enhanced EPDs. His first sons sell, and they are truly exciting.

# Post Rock Cattle Company **SUCCESS**

Congratulations to PRO-HART SEEDSTOCK of Colorado on winning the purebred Winter Bull Calf Division Champion in Denver this year. His sire was acquired as a sight-unseen purchase in our 2015 sale. In addition to this popular champion, Pro-Hart had a tremendous sire group display by his sire in Denver. Well done and well deserved by Greg Hartman and his family.

This year's Balancer Futurity runner-up was awarded to Hilltop Farms of Missouri. This popular son of Post Rock Elba 50U2 who was purchased as lot 121 in the 2014 Post Rock Sale. 50U2 is also the dam of Post Rock Astronaut 157A2 and his full brother who sold at her side has been retained as a featured herdsire for Hilltop Farms as well. Congratulations to the McWilliams family on their many successes' with Post Rock genetics.

Post Rock Wilma 340B8, Supreme Champion Bred and Owned Female 2016 AGJA Jr. National. A flush brother sells as Lot 55.

Meredith won the tough Balancer Spring Heifer Calf Division in the Denver Junior show this year with this Gravity daughter. Flush brothers sell as lots 78 & 79. Their dam was the 2013 Denver Junior show Reserve Champion Female for Meredith and she is also the dam of the Supreme Champion Bred and Owned female the Junior National this past summer.

Post Rock Wilma 294Z8 ET, her first natural calf was the Supreme Champion Bred and Owned Purebred Female at the 2016 Dirt Road Classic for Meredith. Dam of the 2017 Balancer Spring Heifer Calf Champion also. Several of her ET sons highlight this sale offering.

Post Rock Madam 329C1 PB Division Champion 2016 AGJA Jr. National. An Astronaut daughter who sold at side of dam in 2016 Post Rock sale.
