

LARSON'S

**10th Annual
Production Sale**

**Sunday, February 16, 2020
2:00 pm (CT) at the farm, Clearbrook, Minnesota**

Welcome to Larson's Lost River Livestock 10th Annual Production Sale

Greetings from the Larson's and welcome to our 10th Annual Production Sale. As always, we want to thank our previous customers and welcome new friends to our operation. Please free to contact us with any questions you may have about our operation, cattle, production practices, or anything else that may arise.

The decision to purchase breeding stock is not to be taken lightly. You are not simply buying a bull or a heifer, rather you are making a genetic decision which will influence your program for at least the next decade. And at no point in history have we had access to more genetic information to use in selecting cattle. It is easy to become overwhelmed, to get lost in the data. That's where we hope to serve you best. We know these cattle inside and out and supplied with some knowledge of your program, we hope to match you with exactly the bull or female to best fit your operation. We don't have much for hobbies other than talking cattle and would love to talk cattle with you.

We recently read an article in Progressive Farmer that we thought was very pertinent to us as seedstock producers. The article suggested 3 questions buyers should ask their seedstock provider; can I see your cowherd, what is your culling program, and do your cows work for you or do you work for your cows? In answer, we offer the following responses. You are always welcome to review our cowherd and herd bulls. In fact, we have hosted herd tours at our farm and love the opportunity to show folks our cowherd. Our culling program is systematic. If a heifer is open, she is culled, no excuses. Unless we can prove that a mature cow is open for no fault of her own, she is culled. We also cull very hard on udder quality, feet and leg structure and the ability to maintain body condition. Our cows must also be able to wean a calf of acceptable weight without supplemental creep feed. The third question is extremely important for us. Our program begins with heifer development. Our replacement heifers are developed on much the same nutritional program as our young cows, with a minimal amount of extra care. Our philosophy is if she can't survive in a similar system as our cows when she isn't nursing a calf, she won't make it in our cowherd when she is asked to. This helps ensure our cows work for us, not vice versa. This also means that our selection standards for heifers entering our herd include not only physical conformation traits and the appropriate data criteria, but also the ability to perform and grow under real life production conditions. Have confidence that the cattle you buy here will work for you, not the other way around.

Again, please feel free to contact any one of us at the farm, our sale manager Chris Mitchell or any sale staff with questions. Our sale will be broadcast online with DVAuction and videos of sale cattle will be posted to their website 3 weeks prior to the sale. We are again having an open house during the afternoon of February 15 with cattle viewing, coffee and doughnuts. In closing, we sincerely appreciate your interest in our program and hope to see you Sunday February 16, 2020.

Thank you,
The Larsons

10th Annual Production Sale

Sunday, February 16, 2020 2:00 pm (CT)
At the Farm, Clearbrook, Minnesota

Please join us February 15, 2:00 pm, for our Open House and to view the Sale Offering.

Directions to the Sale Facility

3 miles south of Clearbrook on Hwy. 92 and 5 miles west on Hwy. 18 or
10 miles east of Fosston on Hwy. 2, 4 miles north on Hwy. 7 and 3/4 east
on Hwy. 18

SALE FORMAT

The auction will be held in a heated building, with video monitors set up
and each animal's video played while the animal sells. There will be no
live lots in the building. All lots will be penned outside for viewing prior to
the sale.

VIEWING OF CATTLE

Cattle will be penned and available for viewing Saturday afternoon
starting at 2:00 pm, and on sale morning starting at 9:00 am.

VIDEOS AND SUPPLEMENTAL DATA

Videos will be posted online at www.lostriverlivestockmn.com and
www.mms.bz, or mailed upon request. Current weights and
measurements will be available sale day.

ONLINE VIEWING AND BIDDING

The sale will be broadcast live online with DV Auction.
www.dvauction.com See page 3 for more information.

SALE DAY PHONES

LIVESTOCK PRESS REPRESENTATIVES

Kirby Goettsch, Farm & Ranch Guide	605-380-3939
Andrew Swanson, Special Assignment	507-829-4133
Will Fiske, American Gelbvieh Association	540-414-4833
Nolan Woodruff, Red Angus Assoc of America	805-861-0996

COMPLIMENTARY LUNCH

Complimentary lunch served at 12:00 noon.

LODGING

LePier Lodge, Fosston, MN 218-435-1088
Piper's Inn, Clearbrook, MN 218-776-2323

HEALTH

Bulls have received all common calfhood vaccinations and been poured
with Clean Up II. Bred heifers have been vaccinated with ScourBos 9
and poured with Clean Up II. Please ask us for a complete herd health
protocol.

INSURANCE

We strongly encourage all buyers to insure their purchases. Mortality
insurance can be purchased through Lindfors Insurance Agency. 218-
435-6585

TERMS AND CONDITIONS

Each animal will be sold to the highest bidder. The auctioneer will settle
any bid disputes. Animals must be settled for on sale day with cash or
check. All animals are the purchaser's risk as soon as sold. Anyone
attending the sale does so at their own risk. Lost River Livestock, sale
management, and/or any of the sale crew will not be held responsible for
any accidents, damages or stolen items. Lost River Livestock will retain
a 50% semen interest in all bulls sold.

ANNOUNCEMENTS

Any necessary corrections to the sale catalog will be made sale day.
Announcements made sale day and from the auction block take prece-
dence over any printed material in the catalog or otherwise associated

Larson's Lost River Livestock Sale Information

LRL Discounts

Total purchases of \$12,500 or more qualify for free nationwide trucking to central locations
5% discount on purchases of 4 or more bulls
\$50 discount on all bulls hauled within 5 days of the sale

DELIVERY AND BOARDING OPTIONS (NEW IN 2020)

New this year, BULL buyers will have the choice of selecting ONE option from the following list.

1. \$50 off the purchase price of bulls taken home within 5 days of the sale.
2. Free keep until April 15, 2020. Bulls remaining at our farm after April 15, 2020 will be charged \$2/day. Trucking costs will be the responsibility of the buyer and will be based on a prorated pricing structure.
3. Free delivery of bulls up to 300 miles from our farm to central locations in the US. Deliveries over 300 miles will be charged a small fee based on a prorated pricing structure. Deliveries will start the week after the sale.

All females must be taken home within 5 days of the sale unless arrangements have been made with Lost River Livestock.

VOLUME PURCHASES BENEFITS AND DISCOUNTS

Also new this year, purchases totaling \$12,500 or more will receive free trucking to central locations within the US. This applies to any combination of bulls and females.

Again, this year we are offering a 5% discount on the purchase of 4 or more bulls.

BREEDING GUARANTEE

All bulls are sold as guaranteed breeders and heifers sold as bred. In the event of unsatisfactory breeding performance, either a replacement bull or heifer, or a refund of purchase price or a credit will be provided, when defective bull or heifer is returned to the seller in good health. All females sold as "safe in calf" will be examined and declared safe by a licensed veterinarian within 3 weeks of the sale date.

TRANSFER OF REGISTRATION PAPERS

Registration papers will be transferred to the buyer on all registered animals.

BULL PREPARATION, FEED PROGRAM AND AVERAGE DAILY GAIN

Bulls were fed a forage-based ration designed to target 3.25 lbs/day ADG. The test was conducted for approximately 60 days and during this period the bulls exceeded their expected performance. All bulls left on farm after sale day will be placed on a lower energy diet to harden up prior to pasture. We encourage all buyers taking bulls home to continue to feed these young bulls appropriately to ensure continued growth and development.

CALVING EASE STARS

Calving ease stars are listed for all bulls in the sale book. The recommended calving ease for each bull in the sale is based on the recommendations below.

- 1 star: for use on cows with little to no calving difficulties under standard conditions.
- 2 stars: for use on cows with little to no calving difficulties under standard conditions.
- 3 stars: for use on young cows and mature cows with little to no calving difficulties under standard conditions.
- 4 stars: for use on growthy heifers with little to no calving difficulties under standard conditions.
- 5 stars: for use on heifers with little to no calving difficulties under standard conditions.

INTERNATIONAL PURCHASES

We are experienced with exporting cattle and will work with any buyer to expedite the process in a timely manner. Buyer is responsible for all test expense to qualify for export to your area. Upon completion of tests delivery will be arranged at buyers expense.

GELBVIEH & BALANCER®

Smart. Reliable. Profitable.

MATERNAL SUPERIORITY

Gelbvieh and Balancer females offer moderate mature cow size, added fertility, increased longevity, and quiet dispositions.

MORE POUNDS WEANED

Gelbvieh and Balancer cattle are known for their heavier weaning weights, superior growth and wean more pounds of calf per cow exposed.

FEEDLOT PERFORMANCE

Balancer cattle make the grade, add the pounds, and deliver the value all while providing increased efficiency in the feedlot and on the rail.

Bull Selection – Simplified **GRIDMASTER**

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

Ranch Tested. Feedlot Trusted.

Lots 1-2

We are very excited for this year's pen of bulls and would like to introduce to you two Purebred bulls we feel stand at the top of the pen. They are pretty special bulls and could have a very positive impact on the Gelbvieh breed. They are real herdsire prospects with all the pieces to move the breed forward. Both bulls are homozygous black, homozygous polled and come to you with outcross pedigrees with no Carolina Leverage, LAZY TV Sam, or HYEK Black Impact. They are out of our most productive and consistent cow with progeny out of her selling for \$16,000, \$9,000, and \$7,750 at auction over the years. Both of these guys also exhibit excellent EPD strength ranking above breed average for calving ease, growth, maternal and FPI traits. They are well designed bulls with terrific depth of body, overall width and are very sound when they hit the ground. We have been excited about the possibilities of this mating for a long time and can't wait to share these bulls with you. We plan to sample one of these bulls via AI this spring.

Discovery G167 is a purebred Gelbvieh bull with a ton of style and muscle shape. This homozygous black, homozygous polled prospect rings a lot of bells. He comes to the table with top 20% CED, 25% WW, 15% YW and 1% REA. His dam is also an excellent young cow with perfect feet, a great udder and a strong production record to this point with her first calf selling to Stuecken Brothers of MO. She is also a maternal sister to one of our newest donors, LRSF Melanie A20. The Melanie tribe has really emerged as one of our top lines in the past few years and with calves like Discovery G167 as proof, it's easy to see why.

Itasca G184 is a purebred Gelbvieh bull who is a full brother to our lot 2 bull from last year who was a high seller going to Plateau Gelbvieh of CO. This 4-star calving ease prospect really embodies a lot of the traits of his brother being long bodied, deep ribbed and solid footed. And as an added bonus, Itasca G184 is homozygous polled and homozygous black. His dam is one of our very top cows, entering our donor program last year. She is also a two-time Dam of Merit award winner with perfect feet, a great udder and wonderful disposition. She is what we wish every cow could be.

Scout G131 is a moderate framed, homozygous black bull who is also a 4-star calving ease prospect. His dam is a very solid cow with all three of her calves being kept to this point. She maintains a 362-day calving interval with a 101 lifetime WW ratio. Scout G131 himself ranks highly for calving ease with both his CED and BW in the top 20% of the breed. His MARB EPD is also near the top of the breed, ranking in the top 10%.

LRSF Sundown G220 ET Sells as lot 6

Lots 6-9

These 4 full brothers represent some of our best performance genetics. They are consistently good and are peas in a pod when it comes to their design; all being larger framed, long bodied bulls with great depth of rib and excellent muscle expression. They are all homozygous black and homozygous polled and their black hided progeny should command a premium at sale time. Their donor dam is one of our most productive and attractive cows with many sons selling through our sales and many daughters being retained as replacements. The males out of these guys will be very valuable but the females may be where they really shine.

Full Brother sells as lot 12

If you background calves and are looking for a bull to sire calves that grow quickly after weaning, Superior G171 is the bull for you. He is our number one bull for weight gain since weaning and does it with a style. As you can see from his picture, Superior G171 is tremendously long bodied, deep ribbed and is flashy from the side profile. He is also impressive from behind with a very square hip and great muscle expression. He is backed by a strong cow who is a 2-time Dam of Merit award winner out of the prolific female maker, SAV 8180 Traveler 004. She passes that maternal superiority down to her son as he boasts a solid top 15% STAY. His daughters should make terrific replacement females and his sons should be some of your heaviest calves.

Vision G197 ET is a direct son out of one of our best up and coming cows, Nellie B119. In her lifetime, B119 has produced a bred heifer that sold for \$6,500 on the 2018 ND Golden Rule, a bull that sold for \$5,500 on our 2018 production sale and a bull that sold for \$4,250 on our 2019 production sale. She absolutely does not miss and this high percentage Gelbvieh bull is no different. She is a 2-time Dam of Merit award winner and maintains a 369-day calving interval with a 108 lifetime WW ratio. With this cow to back him up, Vision G197 ET should make an excellent breeding piece, siring heavy muscled bulls and super productive females.

Upward G137 is an absolute stud. When you study him, he is super impressive from every angle. From his tremendous depth of body to his great top width, he will sire some heavy, high-value calves. And it's no wonder where he got his power and style; his dam is a terrific cow with a striking phenotype and an excellent production record. She maintains a 364-day calving interval and a 103 lifetime WW ratio and has produced a sale bull with each of her last 3 calves. Don't miss this Homozygous Black stud on sale day.

Jetstream G153 is a larger frame bull with a little extra birth weight but adding his extra performance and size to a group of mature cows will result in a powerful group of calves. Check out Jetstream G153's performance stats: 106 WW ratio, top 20% WW, and top 25% YW. He is out of a high milk production cow who always brings in a heavy calf with great eye appeal. Look to this guy to produce larger framed, high performance calves with the heifers having great maternal ability.

Out of a very strong dam with an excellent track record for producing eye appealing, productive females with great udders and sound feet. She is a beautiful cow with perfect feet and a great udder. She also maintains a very tight 356-day calving interval. Since we purchased her on the Schroeder Ranch dispersal, she has stuck AI 2 out of 3 times and has steadily moved her calving date up. She is a maternally superior female and look for Insight G72 to produce some of your best replacements.

Emphasis G326 may be the youngest bull in the offering but he doesn't give up a lick of performance and style to the older calves in the pen. He came off his young dam with a ton of power and a WW ratio of 120. She herself maintains a 112 lifetime WW ratio and is a solid mama cow with a compact udder and perfect feet. Emphasis G326 has great performance but he also is a standout when it comes to calving ease. He sports top 3% CED and top 30% BW and is a 5-star calving ease prospect. He is the perfect example of a curve bender.

Voyager G168 is very soggy made calf out of one of our best SAV Brilliance daughters. His maternal brother sold on our 2017 production sale to Chimney Butte Ranch in Mandan, ND for \$9,500. He has gone on to produce a number of powerful, eye appealing sons and daughters that have sold well through Doug's sales. His dam is also a 3-time Dam of Merit award winner and maintains a 363-day calving interval with a lifetime WW ratio of 101. Don't forget Voyager G168 is a 4-star calving ease prospect.

Larson's Lost River Livestock Balancer Bulls

LRSF Hamilton G121 ET Sells as lot 18

DDGR Arianna 77B Donor Dam of lots 17-19

The next three lots are full brothers who blow the doors off in terms of muscle definition, power and overall look. They have all tipped the scales since weaning and their performance EPD's are just as impressive. Each bull brings at least top 10% WW and top 20% YW to the table. However, they aren't only power bulls; they all maintain at least top 20% CED, with Roosevelt G84 ET leading the pack with top 4% CED. Their dam is also one of our top donors with her previous flush producing an \$8,000 bull and a \$6,500 bred heifer. We feel there is tremendous potential with these bulls and they should add a ton of muscle and power to any group of calves.

Ten Count G161 is a bull who has improved every day since weaning and is quickly rising to one of the most eye-catching individuals in the pen. He is a 4-star calving ease prospect with top 20% CED and top 25% BW who could breed some heifers in the right situation. His dam is a moderate framed female with a beautiful udder and perfect feet. For us, the dam is an extremely important part of the bull and if she doesn't meet our standards, her calf does not get kept. The bulls in this catalog are out of our top group of sound, functional cows.

Dime G119 is a strong performing bull out of a larger framed cow who always brings in solid calves. He represents the first calf crop we have out of JKGF D007 ET and the D007 calves have really impressed us with their width, depth and overall look. This homozygous black bull exhibits strong performance data as well with top 40% WW and top 30% YW. His daughters should also make nice replacement females with his MILK EPD ranking in the top 25% and STAY in the top 35%.

Larson's Lost River Livestock Balancer Bulls

LRSF Thielen G97 ET

Sells as lot 24

Lots 24-26

The next three lots are about as good a group of bulls as we have ever put together. These full ET brothers are absolute herdsire prospects and will blow you away. They excel in person in terms of width, dimension and soundness; and they excel on paper with tremendous EPD strength. They are complete in every sense of the word and all have excellent dispositions. They are also maternal brothers to the 2020 Peoples Choice Balancer Futurity Champion at the NWSS who also went on to be the National Champion Balancer Bull. They are all homozygous polled with Hrbek G140 ET being homozygous black. All three of these bulls can have a very positive impact on the Gelbvieh breed and we plan to sample one of these bulls this spring via AI.

Optimum G46 leads off a new sire group for us and has been an absolute crowd favorite from day 1. He is as impressive as any bull in the pen and just blows us away from every angle. His abundance of muscle, width and power is hard to describe and then when you factor in his top end calving ease traits, he really separates himself. He is homozygous black, homozygous polled and his EPD strength is tremendous. He boasts top 2% CED, 5% WW, 10% YW, 1% STAY and 15% FPI. He really rings all the bells and will garner a lot of attention on sale day.

Upgrade G13 is another excellent son of JRI Optimizer who exhibits the same traits as his brothers. He is moderate framed, level topped and as wide and heavy muscled as you can make one. The first thing you will notice about these Optimizer sons is how much muscle shape and width they have. They are absolute tanks while maintaining excellent calving ease traits. All of these Optimizer sons were born without assistance out of first calf heifers and have developed into absolute studs.

Streamline G41 comes from a line of very productive and attractive females with perfect udders and excellent feet. He looks to carry on part of that tradition as he sets down on very nice feet and has great set to his hock and pastern. Streamline G41 is a very well made, balanced bull with a ton of muscle shape and width, just like the other Optimizer bulls in the pen. He is a moderate framed bull but doesn't give up any performance with top 25% WW, top 20% YW and a 107 WW ratio off a first calf heifer.

Elevate G66 is another 4.5-star calving ease prospect, just like lot 27 and 28. All three bulls have excellent calving ease traits and will likely work on heifers. But their power and muscle development to this point is where they really shine. Elevate G66 brings strong performance to the table with top 20% WW and YW and 111 WW ratio off of a first calf heifer. His dam traces back to an excellent cow we purchased on the Schroeder Ranch dispersal sale SD. Elevate G66's granddam, X001 has been a standout cow for us with a great disposition, perfect feet and a solid udder.

As you can see from his picture, Enhance G26 is a very striking individual. This 5-star calving ease prospect is a really strong heifer bull candidate tracing back to one of our newest donors, LRSF Melanie A20. She one of the prettiest cows we own and her production might outweigh her attractive profile. Enhance G26 is also strong from a maternal prospective with top 15% MILK and top 25% STAY. His calves should come out easy and develop into attractive, valuable calves with his daughters being ultra-productive.

Lincoln G49 is the first calf out of KM Broken Bow 002, an Angus bull we used on heifers last year and we have been really pleased with the results. The Broken Bow calves came out really easy and grew nicely. They have great length of body and are very square hipped. They also exhibit the strong calving ease traits a guy is looking for when selecting a bull to use on heifers; a small head, smooth shoulders and a sleek design. Lincoln G49 is a 5-star calving ease prospect and should work very well on a group of heifers.

Larson's Lost River Livestock Angus Bulls

This past fall, we purchased the entire Strandberg Angus herd and these next 4 bulls represent the best of their program. They are all purebred Angus, sired by breed leading AI sires and raised by moderate framed, sound footed, good uddered Angus cows. The bulls' dams are all 5 years old and older so you know there is longevity and soundness bred into these guys. They all weaned off with adjusted weaning weights near 700 lbs or better so there is strong performance here as well. Buy with confidence here and as with the rest of our cattle, we stand behind these bulls 100%.

Ambition G87 holds the title of our lead off Red Angus bull and he is one we are pretty excited about. He has been a standout since day one and his performance and style are hard to beat. This bull has a ton of power and length with tremendous muscle expression and depth of body. He is also a leader in terms of EPD's with top 24% Herdbuilder, 4% Gridmaster, 4% growth and still maintains breed average calving ease traits. His dam is an easy fleshing cow with a good udder and really strong feet. Look for this guy to sire some of your heaviest calves and females that will be easy to keep.

Vitality G151 is another 4-star calving ease prospect sired by the ultra-popular WFL Merlin 018A. The Merlin calves have been really well-received throughout the country and for good reason. They are born easy out of both cows and heifers and grow like crazy. They are super functional cattle with a ton of muscle and depth. Vitality G151 embodies all those traits and is also backed by a very sound, easy fleshing cow with a very nice udder and perfect feet.

Enterprise G78 is a well-balanced bull who blends power and calving ease into a very nice package. His birth to yearling spread is tremendous, going from a -2.9 BW to 118 YW, which ranks in the top 20% and top 4% of the breed respectively. He also stacks two of the most popular Red Angus AI sires of recent memory, WFL Merlin 018A and BROWN JYJ Redemption Y1334. Those genetics are some of the most consistent, powerful and eye appealing we have used. With those 2 bulls backing him up, Enterprise G78 should be a no-miss sort of bull.

LRL Commitment G88

Sells as lot 53

Lots 53-54

These two full ET brothers really knock it out of the park when you look at them on paper. They tout outstanding index values with both bulls ranking in the top 13% for Herdbuilder and top 4% for Gridmaster. They are also very similar in terms of phenotype with both bulls being moderate framed and super deep bodied. They hit the ground wide and carry that width all the way up with great muscle shape and expression. Both bulls are 4-star calving ease prospects and would make a potent duo during the breeding season. Take both of these guys home, turn them out and you'll end up with a set of calves that come out easy, grow quickly and are very uniform when it comes time to sell.

We are excited to introduce our lead-off bred heifer this year, Sarah F49. We feel she is one of the very best and most balanced females we have ever offered. From a phenotype standpoint, she is an absolute tank; she carries a world of rib and dimension while blending that power with a feminine front one-third. She has a ton of bone and comes down on a great set of feet with excellent angles to her hock and pastern. And she is also a total sweetheart on top of it all. Sarah F49 also reads very impressively on paper with top 10% WW, 5% YW, 25% STAY and 35% FPI. She is due January 30, 2020 with a heifer calf sired by MJBC Franchise F806 and should have a calf at side by sale day. This mating could be something really special.

Nellie F83 is another Ditka sired female and more moderate framed than some of her sisters but doesn't give up any depth or width to the larger framed heifers in the pen. She may be the deepest sided and stoutest heifer in the whole pen. And just like the other Ditka females, she is very clean fronted, gets out and moves very nicely and sports an excellent set of EPD's. She comes to you with top 20% CED, 10% BW, 5% STAY, 30% REA and 15% \$COW. She is also a member of our Nellie tribe and that family is as maternally focused as any we have. Due March 9, 2020 with a heifer calf sired by DDGR Coach 57E.

Snazzy F219 is a larger framed female tracing back to the prolific Snazzy 114L cow who did so many good things for our herd. The Snazzy name can be found throughout this catalog and for good reason. The Snazzy cows are super functional females who always bring in some of our best calves. Combine that line of cows with Ditka and you get this strong female. Snazzy F219 is bred to JRI Optimizer 148A4, who is the sire to one of the most impressive sire groups in our sale this year. The calf from this mating should be a stunner. She is due January 30, 2020 with a calf sired by JRI Optimizer 148A4 and should have a calf at side by sale day.

Brittany F147 is a very attractive female and will definitely catch your eye on sale day. She is exactly the kind of female we like to see; super clean fronted, wide through her middle and square when you stand behind her. She gets out and moves with ease and has an easy-going disposition. The pedigree behind this female also gives her a ton of strength. The combination of her sire (DLW Highly Focused) and maternal grandsire (BNC Apollo) has really worked well for us. The calving ease and smooth design of the Highly Focused bull mated to the power and muscle of Apollo females makes a tremendous cross. Brittany F147 is due February 20, 2020 with a heifer calf sired by JRI Optimizer 148A4.

Queen F30 is a long spined, ultra-feminine female with great feet and excellent bone structure. She moves out with ease and maintains an excellent disposition. She is a daughter of VGW Direct Drive 512 and his daughters are quickly becoming one of our favorite sire groups. They are setting down near perfect udders and have excellent hoof structure. They look to become high performance, eye catching females who should remain in our herd for years. Due February 25, 2020 with a heifer calf sired by DDGR Coach 57E.

Early Dawn F77 is a female with the extra power and capacity to be able to raise some whopping good calves. She is a true power female with top 5% WW and top 10% YW. She also sports a 104 WW ratio and a 106 YW ratio. Her mother is also a powerful cow with high milk production ability and is a 3-time Dam of Merit award winner. Early Dawn F77 is due April 8, 2020 with a calf sired by DDGR Coach 57E. Combining her power with the calving ease of Coach should result in an excellent calf.

Katlyn F263 is a higher performance female with an abundance of rib and depth of body. She is out of the Buck bull we used for many years and he left us with attractive females with solid udders and great feet. Look for the Katlyn F263 to follow in those footsteps. And the baby she is carrying should be a stout, dark red calf with excellent growth potential. She is due January 30, 2020 with a calf sired by WFL Merlin 018A and should have a calf at side by sale day.

Larson's Lost River Livestock Red Angus Females

LRL Lakota F127 ET

Sells as lot 81

Lots 81-82

Here are two full ET sisters who have very bright futures ahead of them. Their donor dam is arguably our most productive Red Angus female and she has produced a top-end calf with nearly every try. These sisters come from a flush where their dam produced 32 grade one embryos resulting in a number of sale bulls and replacement females. Their dam knocks it out of the park in nearly everything she does and these girls look to follow in her footsteps. The sire to these heifers is the very popular 5L Defender 560-30Z who is being used around the country to increase calving ease and carcass merit while also widening out his progeny. Both of these females embody those traits with top 23% CED, top 22% MARB and both are very well-made females.

The Value of DNA Information in the Multi-breed Genetic Evaluation powered by BOLT

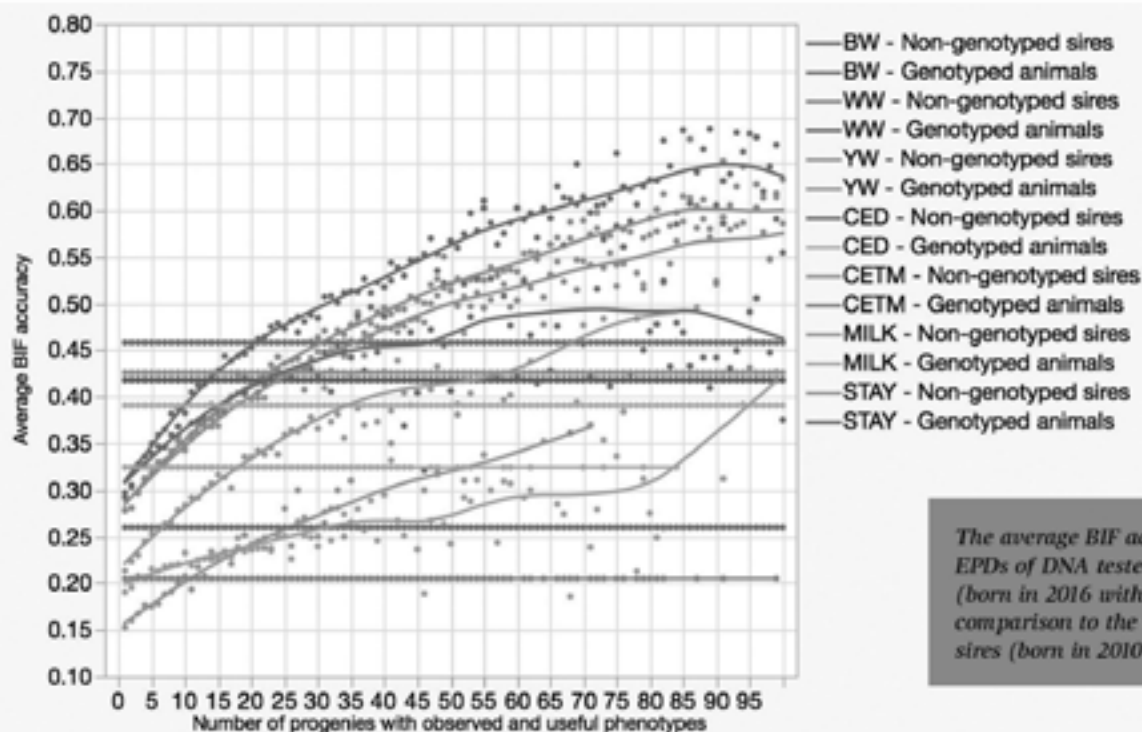

By Mahdi Saatchi, Rohan L. Fernando, Lauren Hyde, Jackie Atkins, Steve McGuire, Wade Shafer, Matt L. Spangler, and Bruce Golden, IGS Genetic Evaluation Team and Consultants.

DNA profiles provide additional information about the genetic merit of a DNA tested animal and increase the accuracy of EPDs, which are called Genomic Enhanced EPD or GE-EPDs. In the IGS Single-step process, the DNA marker genotypes are directly incorporated into the genetic evaluation along with the phenotypes (performance data) and the pedigree. As a result, the DNA information has an impact not only on the genotyped individual, but also on all the relatives of that genotyped individual. This allows for the DNA information to improve the accuracy of non-genotyped relatives.

To measure the impact of DNA information on accuracies of GE-EPDs in the IGS Single-step genetic evaluations, we compared the average BIF accuracies of GE-EPDs of DNA tested young animals (born in 2016 with no

progeny) to the average BIF accuracies of non-genotyped sires born in 2010-2014. Only sires with non-genotyped calves were used for this comparison. We found that the average BIF accuracy of GE-EPD for a DNA tested young animal is equivalent to the average BIF accuracy of a non-genotyped sire with 21, 22 and 24 calves with observed phenotypes for birth, weaning and yearling weights, respectively (Figure 1, where a horizontal line cross a curve for a specific trait (e.g. red line and blue curve cross each other at the data point correspond to $y(\text{accuracy}) = 0.46$ and $x(\text{progeny}) = 21$ for birth weight)). The progeny equivalent (PE) for direct calving ease was 15 and it was only 3 for total maternal calving ease due to limited genotypes on cows. The PE for milk and stayability were 18 and 25, respectively (Figure 1).

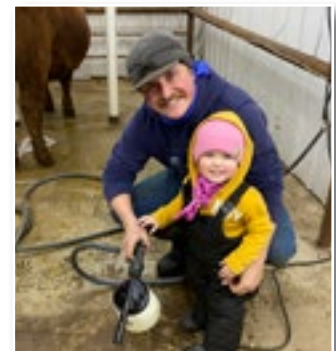

Figure 1

The average BIF accuracies of GE-EPDs of DNA tested young animals (born in 2016 with no progeny) in comparison to the non-genotyped sires (born in 2010-2014).

The Multi-breed Genetic Evaluation powered by BOLT is a breakthrough in GE-EPD accuracy improvement. Enabling technologies such as BOLT software allow for even faster genetic progress with more accurate EPDs earlier in an animal's life. We (IGS) are dedicated to using the best available technology to deliver more accurate GE-EPDs to our members so they have the best tools available for their selection decisions. ♦
